DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1-34, drawn to a magnetically differential input circuit to a single-ended signal source to a single ended receiving circuit and a magnetically differential input circuit coupled to a differential signals to differential receiving circuit, classified in class455, subclass 127.1.

II. Claims 35-48, drawn to integrated receiver circuit comprising an amplifier and a magnetically differential input circuit coupled to an amplifier input, the input circuit to couple the amplifier to a source of signals , classified in class455, subclass 333.

2. Inventions group I and group II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention of group II has integrated receiver circuit comprising an amplifier and a magnetically differential input circuit coupled to an amplifier input, the input circuit to couple the amplifier to a source of signals , classified in class455, subclass 333. See MPEP § 806.05(d).

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
